

## WEEKLY REPORT

### **Work done in last week ( Attach supporting Documents):**

1. Complete with documentation of the API's.
2. Learned new topics of the .net core like Routing & also understanding the 3 layer architecture of asp .net core web API.
3. New task is to convert previously created API into architecture of the EHR API system's architecture.
4. Start with the new task and create the basic structure of the API like controllers, Business services , Business models, Data services , Data models, DataFilters and Partial data services.
- 5.

### **Reason for incomplete work:**

1. Remaining with all API's full structure because the lack of understanding.

### **Plans for next week:**

1. Try to complete the given task API's.
2. Try to Lock 5 paragraphs in the mem portal to give a typing test..
