

WEEKLY REPORT

Work done in last week (Attach supporting Documents):

1. Work on review points given last week.
2. Understanding structure of the Backend of the EHR API.
3. Learning each module for and understanding the flow of the structure.
4. Understanding the flow of the API in Web-ims software.(At which time which API will call and according that which files will be used to store and read the data in postgresql database)
5. Making the documentation of the Patient demographics page's API's in which all the details are covered like
 - Total number of files used
 - which files are used
 - work of each files
 - If we want to create new API than which files are going to be used(List of that files.).

Reason for incomplete work:

Nothing Incomplete for the week.

Plans for next week:

1. Try to finish the documentation.
2. Start learning the new concept of the .Net Core.
