

## WEEKLY REPORT

### **Work done in last week (Attach supporting Documents):**

1. Learned concept related to .net framework and c# programming language.
2. Also learned how we can create APIs in .net framework using c#.
3. Task: - Created add patient, get patient details using patient ID delete patient details and update patient details APIs for WebIMS clone using .net and c#.
4. Integrate APIs in front-end.
5. Product Training: - understood all about billing module and insurance tracking module.

### **Reason for incomplete work:**

1. Changes in requirements.
2. And some problem in API logic part.

### **Plans for next week:**

1. To complete API integration.
2. To complete Cyber security attack course.
